October 2025 Edition

Building a Greener Future Through Responsible Banking

1st Valley Bank continues to lead the way in empowering local communities by promoting responsible and sustainable banking practices across Mindanao. This month, the bank launched its **“Green Growth Initiative”**—a comprehensive financial program designed to support environmentally conscious entrepreneurs and sustainable livelihood projects.

According to Bank President **Jose Emmanuel Montecillo**, this initiative reaffirms the institution’s commitment to inclusive development. “At 1st Valley Bank, we believe in financing growth that uplifts communities while protecting our environment,” he said. The program features low-interest loans for eco-friendly businesses and access to digital banking services tailored for micro and small enterprises.

Digital Transformation for Inclusive Finance

As part of its modernization efforts, 1st Valley Bank has expanded its digital banking ecosystem—introducing user-friendly mobile applications, QR code payments, and real-time customer support powered by AI. These innovations are helping bridge the financial gap for underserved areas while ensuring security and accessibility for all clients.

“Our mission is to empower Filipinos through accessible, secure, and sustainable financial services,” Montecillo emphasized. “By integrating digital solutions with community-centered programs, we are shaping a financially inclusive future for every Filipino.”
